

FIS Internet Banking

Reduce costs and generate customer loyalty

FIS™ Internet Banking lets you offer state-of-the-art banking services to people who prefer to budget and manage their money online, without adding to your costs. In fact, FIS Internet Banking can reduce your costs by replacing mechanical check processing with electronic transaction processing and also help generate new fee revenue from services that are common in today's online environment. Provide these services and your clients will be loyal to your financial institution.

Studies show that customers who bank online have deeper, more profitable relationships with their financial institutions. It is smart business to attract and retain these savvy customers by offering quality services and the latest technology – technology such as the FIS Internet Banking solution. FIS Internet Banking provides a secure virtual branch at your clients' convenience. This easy and flexible service gives end-users convenient 24-hour access to the information they need to manage their finances.

FIS Internet Banking

With FIS Internet Banking, online customers or members enjoy:

- **Convenience** – End-users can monitor their accounts or make transactions from any computer at any time.
- **Security** – Special security settings make banking online safer than ever.
- **Time and money savings** – By stopping payments, requesting copies of checks or transferring funds online, end-users save trips to the branch and costly phone calls to your staff.
- **Flexibility** – End-users can make address changes, set up recurring transfers and more at their leisure.

Competitive Advantage

When comparing Internet banking programs, it's important to know how FIS programs compare to others in the industry.

FIS Internet Banking offers:

- Multiple enrollment methods
- One screen showing all accounts
- The ability to make loan or credit card payments online
- Real-time funds movement
- Secure messaging between customer and financial institution
- End-user marketing materials and training

Ongoing FIS Support

Partnering with FIS, you will receive ongoing marketing, training and customer service support for Internet banking before, during and after it is up and running at your financial institution.

Marketing – From product launch marketing materials to growth and retention campaigns, we will assist in the promotion of your FIS Internet Banking product. We also offer extensive up-to-date product information in webinars, newsletters and more.

Training – FIS offers training and retraining for your staff to ensure they are knowledgeable about all aspects of Internet banking before and after implementation.

Customer Service – If you or your end-users have questions about FIS Internet Banking, your dedicated FIS account manager will make sure you have answers.
